The Data Journalism Handbook

The Data Journalism Handbook

[SIGN UP TO GET UPDATES](#)

The Data Journalism Handbook is a free, open source reference book for anyone interested in the emerging field of data journalism.

It was born at a 48 hour workshop at [MozFest 2011](#) in London. It subsequently spilled over into an international, collaborative effort involving dozens of data journalism's leading advocates and best practitioners - including from the Australian Broadcasting Corporation, the BBC, the Chicago Tribune, Deutsche Welle, the Guardian, the Financial Times, Helsingin Sanomat, La Nacion, the New York Times, ProPublica, the Washington Post, the Texas Tribune, Verdens Gang, Wales Online, Zeit Online and many others.

[O'REILLY BOOK AVAILABLE](#) [FREE WEB VERSION AVAILABLE](#)

Now also available in:
[Russian](#) - [Spanish](#) - [French](#) - [Georgian](#)

How journalists can use data to improve the news

The Data Journalism Handbook

Edited by Jonathan Gray, Liliana Bounegru and Lucy Chambers

http://ria.ru/files/book/_site/index.html

Что такое журналистика данных?

Журналистика данных – это зонтичный термин, который охватывает многое, включая в себя все новый и новый набор инструментов, техник и подходов к рассказыванию историй, описанию событий, созданию сюжетов.

(Арон Пилхофер – Aron Pilhofer, New York Times)

Источник: http://ria.ru/files/book/_site/введение_2.html

Что такое журналистика данных?

Журналистика данных – это добыча, описание, курирование и публикация данных в общественных интересах.

(Джонатан Стрей – Jonathan Stray, профессиональный журналист и специалист в области информатики)

Источник: http://ria.ru/files/book/_site/введение_2.html

Что такое журналистика данных?

Журналистика, основанная на данных – это будущее.

Журналисты должны хорошо уметь работать с данными и ориентироваться в них, как рыба в воде. Мы привыкли к тому, что сюжеты создаются по итогам общения с людьми в барах, и периодически такой способ все еще актуален. Но сейчас все больше и больше приходится углубляться в данные и снабжать себя инструментами их анализа и отбора того, что действительно интересно. Представлять информацию в истинном свете, помогать людям действительно увидеть, как все данные сочетаются друг с другом, и что происходит в государстве.

(Тим Бернерс-Ли – Tim Burners-Lee, создатель всемирной паутины)

Лучшие практики. The Guardian

The screenshot shows the homepage of The Guardian website. At the top, there are navigation links for 'sign in', 'become a supporter', 'subscribe', 'search', 'jobs', 'dating', 'more', 'International', and the 'the guardian' logo. Below the header is a horizontal menu with categories: 'UK', 'world', 'sport', 'football', 'opinion', 'culture', 'business', 'lifestyle', 'fashion', 'environment', 'tech', and 'travel'. To the right of the menu is a link to 'browse all sections'. The main content area has a 'home' link and a 'datablog' section. The 'datablog' section features a title 'Flu tracking in Australia: weekly updates on symptoms around the country' and a description: 'This interactive graphic provides weekly updates on the flu situation around Australia, based on a weekly survey of over 20,000 Australians'. Below the description is a small icon with the number '47'. To the right of the datablog is a map of Australia with colored dots representing flu symptom data. Further down the page are three smaller news cards: one about 'Bigger than Waterloo: the internet's favourite Eurovision winners' (with a thumbnail of ABBA and a '46' comment count), one about 'Spill: Turnbull replaces Abbott' (with a chart thumbnail), and one about 'US election results' (with a map thumbnail).

FT Data on statistics

About this blog Feedback Commenting

Welcome. FT data is a collaborative effort from journalists across the FT working in data journalism, statistics and data visualisation.

We aim to look at statistical issues in depth and provide original analysis of data. Occasionally we'll also post guest contributions.

Data Journalist Job

Data Journalism Jobs							
Job	Company	Location	Salary	Skills	Details	Apply	Date submitted
Data reporter	Las Vegas Review-Journal	Las Vegas, NV		Applicants should have experience with programs needed for data manipulation and presentation -- including Excel, Access, Illustrator, Tableau, Google Fusion -- as well as experience with data mapping tools. Intermediate or better coding skills are a definite plus. Applicants should have at least a bachelor's degree in journalism, communications or a related field, reporting experience and a record of delivering results in a deadline environment.	The Las Vegas Review-Journal is seeking a data-driven journalist to work with reporters and editors throughout the newsroom to produce information-rich stories across all platforms. This person must know how to find, mine and analyze data, and ideally, will have the reporting and writing skills to help readers understand the data behind the news. The ideal candidate will have familiarity with existing public data sets and government data sources.	pjohnson@reviewjournal.com	10/26/2016
Editorial Designer	The Marshall Project	New York		The ideal candidate is a well-rounded journalist and designer with 3-5 years' experience in media and/or publishing. The Editorial Designer should have a wide range of visual interests and experience and the ability to juggle a variety of tasks in a small but ambitious newsroom.	The Marshall Project seeks a full-time Editorial Designer to join us in our office in New York and oversee the award-winning visuals of the publication, including digital design, photography and illustration.	Apply here	10/25/2016
Data Visuals	Texas Tribune	Austin, TX		You'll be asked to gather your own data. Our editorial Data Visuals team works in		jobs@texastribune.org	9/29/2016

Data Journalist Vacancies @ LinkedIn

The screenshot shows a LinkedIn search interface. At the top, there are search fields for 'Data Journalism' and 'США' (USA), and a 'Поиск вакансий' (Search jobs) button. To the left, a sidebar offers options to receive notifications about new vacancies and includes dropdown menus for 'Region' (listing New York, San Francisco, Chicago, Washington, and Los Angeles) and 'Company'. The main results section displays three job listings:

- Copywriter** at Scout Exchange in Boston, Massachusetts. The listing notes a 'creative spirit that can turn data into engaging content...' and mentions an 'intelligence team to gather data to and develop...'. An 'Apply' button is present.
- Data Editor/Video Producer - CBSNews.com** at CBS Interactive in New York City, NY, US. The listing is marked as a 'НОВИНКА' (New). It describes the role as a 'data editor/producer for its MoneyWatch section...' and includes a link to my.jobs.
- Career Opportunities: Data Reporter** at VelvetJobs in Woodland Park, NJ, US. The listing is also marked as a 'НОВИНКА'. It describes the role as involving 'analyze, and present data-driven journalism...' and 'In This Role, You Will Lead data-driven journalism...' with a link to www.velvetjobs.com.

Международный фестиваль журналистики. Секция журналистики данных

The screenshot shows the homepage of the International Journalism Festival (IHF) website for the 2013 edition. The header includes the IHF logo (#j14), the location (perugia, italy), the dates (30 april - 4 may 2014), the edition (VIII), and the entry status (free entry). Navigation links include My Festival (make your programme), who we are, sponsors, media partners, partners, contact, press area, and register newsletter. A search bar is also present.

The main content area features the title "data journalism 2013" and a note about the provisional programme being updated on Wednesday, April 24, 2013, at 07:02. There are social sharing options for Facebook, Google+, Twitter, and LinkedIn. Below this, there's a "Categories" section with links to keynote speeches, panel discussions, press reviews, in conversation, documentaries, award ceremonies, books, live from Perugia, workshops, theatre shows, data journalism, presentations, hackers' corner, ONA, and CJR. An "Event locations" dropdown menu is also visible.

The programme is organized into five days: Wednesday 24, Thursday 25, Friday 26, Saturday 27, and Sunday 28. Each day has a grid of events. For example, on Wednesday 24, there are two events: "14:00 - 15:30 Hotel Sangallo Excel for journalists" and "18:00 - 19:30 Hotel Brufani - Sala Raffaello The state of data journalism in 2013". On Thursday 25, there are two events: "09:30 - 11:00 Hotel Brufani - Sala Raffaello Data and investigations: collaborating across borders" and "14:00 - 15:30 Hotel Sangallo Social network analysis for journalists using the Twitter API". On Friday 26, there are three events: "09:30 - 11:00 Hotel Brufani - Sala Raffaello Data journalism in Southern Europe", "14:00 - 15:30 Hotel Sangallo Making data visualisations: a survival guide", and "14:00 - 15:30 Hotel Sangallo Data journalism in Southern Europe". On Saturday 27, there are three events: "09:00 - 10:30 Hotel Brufani - Sala Raffaello Covering emergencies in the age of big data", "10:30 - 11:30 Hotel Brufani - Sala Raffaello Best of 2013 data journalism announced", and "14:00 - 15:30 Hotel Sangallo Data visualisation, maps and timelines on a shoestring". On Sunday 28, there is one event: "14:00 - 15:30 Hotel Sangallo Data visualisation, maps and timelines on a shoestring".

At the bottom of the page, a footer note reads "2012 Il Filo di Arianna - © All rights reserved P.I. 02480770540".

Европейский Центр Журналистики

The screenshot shows the homepage of the Data Driven Journalism website. At the top, there is a logo consisting of three red bars of increasing height, followed by the text "Data Driven Journalism" and "WHERE JOURNALISM MEETS DATA". A search bar and social media links (Twitter, Facebook, RSS) are also at the top. Below the header, a navigation menu includes "About", "News & Analysis", "Events", "Featured Projects", "Resources" (which is underlined), "Mailinglist", and "Course". A breadcrumb navigation "Home > Resources > Overview" is visible. The main content area has a title "Resources" with a dotted line separator. It features two articles: one about "Tabula 1.0 released" (with a PDF icon) and another about "Use flowcharts to avoid getting stuck in data journalism projects" (with a flowchart icon). To the right, there are two sidebar boxes: "Submit your resource" (with a "Do you want to see your work featured on our website?" link) and "Upcoming Events" (listing the "News Impact Summit" from 3/9/2015 to 3/9/2015).

Курсы по дата-журналистике

The screenshot shows the homepage of the Data Journalism Course. At the top, the title "Doing Journalism with Data: First Steps, Skills and Tools" is displayed in red and green text. Below it, a subtitle reads "A free online data journalism course with 5 leading experts." To the right is the "Data Driven Journalism" logo, featuring a stylized bar chart icon and the text "Data Driven Journalism WHERE JOURNALISM MEETS DATA". A note at the top indicates the course was open from May 19th 2014 until March 31st 2015. The navigation menu includes links for HOME, COURSE OVERVIEW, ABOUT, GRADUATES, GIVEAWAYS, FAQ, CONTACT, and REGISTER. Social media icons for Twitter and Facebook are also present. A yellow banner below the menu states "NOTICE: We are relaunching the course very soon, click here to get notified!". On the left side, three orange buttons encourage users to "LEARN MORE", "REGISTER NOW", and join "LOCAL LEARNING GROUPS". On the right, a video player shows a thumbnail for the course with the title "Doing Journalism with Data: First Steps, Skills and Tools" and a play button.

Школа данных

The screenshot shows the homepage of the School of Data website. At the top, there's a blue header bar with the "SCHOOL OF DATA" logo on the left and navigation links like "About", "Learn", "Teach", "Events", "Blog", "Support Us", and social media icons for Twitter and Facebook. Below the header, the main content area has a white background. On the left, a large white speech bubble contains the word "Welcome!" and a brief description of the organization's mission to empower civil society organizations, journalists, and citizens with data skills. It also includes a call to action to "Get started with School of Data today!". To the right of this, under the heading "Join School of Data", there's a section about courses for everyone, a newsletter sign-up form, and a "Subscribe" button. Further down, there's a "Check out our blog!" section with a "Blog" button in a blue speech bubble. This section includes a call to send data stories and a link to the blog guidelines. Below this, there are two blog posts: "InfoAmazonia and Why We Should Talk About..." and "Data roundup, June 19". Each post has a small thumbnail image and a "Go to blog »" link. At the bottom of the page, there's a light blue footer section with the "About School of Data" heading and a brief description of the organization's mission.

Expeditions into the Data Landscape: the School of Data goes to #MozFest

Find out what happened at MozFest – and see the tools and data sets to recreate it yourself!

Saturday morning at MozFest. A sold out building, full of a thousand hackers, builders, makers, geeks, journalists, thinkers and more. And right at the top on the 9th floor? Three 'data sherpas' in sparkly cloaks...

Data Expeditions

The concept behind the 'Data Expeditions' run by the School of Data at this year's MozFest was simple. Based on the 'Dungeons and Dragons' role-playing game, data explorers would tackle real world problems together, developing their data wrangling skills in the process.

As a first step, explorers were asked to rate their abilities. Can you tell a story? analyse data? code? tweet? draw? The emphasis was on 'doing', but not in any narrow sense – often, it's the data newbie asking a 'stupid question' that sets the team on a fresh track, and becomes the biggest contribution of the day.

Next came the quests. Three Data Sherpas (still sparkling) set out three missions: delving into the data surrounding extractive industries and oil mines; exploring possible causes for a dramatic
